Potato advisor knowledge base, version 0

Collected 29 October 2026 for the Goldmine potato advisor prototype.
Rule: the bot answers only from passages in this file, and names the source in every answer.

SOURCE 1: Punjab Agriculture Department, Government of the Punjab

Title: Potato (crop page)
URL: https://agripunjab.punjab.gov.pk/node/9632
Status: OFFICIAL

1.1 Seasons

Punjab grows three potato crops: a spring crop and an autumn crop in the plains, and a summer crop in the hilly areas.

1.2 Main growing districts

About 75% of Punjab's potatoes come from Kasur, Okara, Depalpur, Sahiwal and Pakpattan.

1.3 Sowing time

All varieties released by the Potato Research Institute, Sahiwal, are sown in the second half of October.

1.4 Varieties recommended for Gujranwala

Two of the institute's varieties are recommended for Gujranwala (and Sialkot):

- Sialkot Red (SH-1035), released 2018. Red skin. Average yield 25.8 tonnes per hectare. High yield, climate resilient, tolerant of frost and disease.
- SH-5, released 2006. Red skin. Average yield 35.0 tonnes per hectare. Late maturing, tolerant of frost and disease.

1.5 All varieties from the Potato Research Institute, Sahiwal

			Avg	Recommended	

Variety	Released	Skin	yield (t/ha)	areas	Traits
Sahiwal Red (FD 76-67)	2019	Red	28.4	Sahiwal, Okara, Pakpattan, Kasur	High yield, frost and disease tolerant
Sahiwal White (FD 73-110)	2019	White	30.5	Sahiwal, Okara, Pakpattan, Kasur	High yield, climate resilient, frost and disease tolerant
Cosmo (FD 78-51)	2019	Yellow	29.9	Sahiwal, Okara, Pakpattan, Kasur	High yield, frost and disease tolerant
Sialkot Red (SH-1035)	2018	Red	25.8	Sialkot, Gujranwala, Sahiwal, Okara, Pakpattan, Kasur	High yield, climate resilient, frost and disease tolerant
Sadaf (FD 78-36)	2016	White	26.6	Sahiwal, Okara, Pakpattan, Kasur	Climate resilient, frost and disease tolerant, good for processing
Ruby (FD 63-1)	2016	Red	27.3	Sahiwal, Okara, Pakpattan, Kasur	Late maturing, frost and disease tolerant, good for processing
PRI-Red (FD 70-1)	2013	Red	34.2	Sahiwal, Okara, Pakpattan, Kasur	Late maturing, frost and disease tolerant
SH-5	2006	Red	35.0	Sialkot, Gujranwala, Sahiwal, Okara, Pakpattan, Kasur	Late maturing, frost and disease tolerant

Note for the bot: 1 hectare is about 2.47 acres. Farmers think in acres and maunds; convert only if asked, and say it is a conversion.

SOURCE 2: Punjab agriculture helpline and Gujranwala extension office

Status: TO COLLECT (Amena)
Needed: the official potato production plan covering seed, fertiliser, irrigation, late blight

and other diseases, frost, harvest.
Ask for it as a PDF or leaflet. A photo of a paper leaflet is fine; Ali can extract the text.

SOURCE 3: What the Gujranwala farmer follows

Status: TO COLLECT (Amena, during the interview)
Ask which leaflet, officer or dealer advice he uses. Photograph any printed guidance.

Topics the bot must refuse until Source 2 is in

Fertiliser amounts, spray chemicals and doses, irrigation schedule, disease treatment.
Reply: "Is ka official jawab abhi mere paas nahi. Apne agriculture officer se poochein." plus the helpline number.
